Introduction

Minda Silca Engg Ltd was formed after a Joint Venture between US \$ 375 million (Rs 1700 Crores) renowned Minda Group of India and Silca Inc. of Italy, a member of US \$ 1250 million of renowned Kaba group. Silca Inc. is world's leaders in key blank, key cutting machine and transponder key production where as Minda group is an Indian major in automobile OEM with 22 plants located India, Germany, Indonesia, Poland, Czech Republic, Vietnam, Japan, and Uzbekistan. The Group also has several JVs with leading companies from USA, Japan, Germany, France, Italy, and Switzerland.

Equipped with the most sophisticated technologies, Minda Silca Engineering Limited is involved into the business of providing solutions to all type of keys and key cutting machines for both OEM (Original Equipment Manufacturer) and after markets and is the only dedicated unit in India for the purpose.

Our USP lies in low-cost manufacturing at global quality levels, appropriate in-house design and engineering using the latest technologies. At Minda, we simply have only one motto – to help our Customers stay ahead!

History

Minda Silca Engineering limited was incepted in year 2002 by A K Minda group with the name of Tuff Engineering Pvt. Ltd.

Based at Noida, this company of A.K. Minda group initiated with humble beginning by Partnering in providing key solutions to Original Key Manufacturers.

From supplying keys to OEMs of the parent company Tuff joined hands with Silca Inc. of Italy a member of world renowned Kaba group to be called as Minda Silca Engineering Ltd.

Vision

To increase shareholder value by delivering system solutions that help our customer exceed there goals, and distinguish Minda Silca as the supplier, employer and community citizen of choice.

Mission

Our Mission is to be globally recognized as world class system supplier to our valued customers by doing 360 degree innovation, making excellence a habit, utilizing cutting edge technologies and delivering maximum customer satisfaction.

Philosophy

Minda Silca has always believed in the philosophy of customer first and Profit with principles.

Dear Client,

We thank you for having chosen Minda Silca products.

Our keys are exclusively produced with certified first pick raw materials.

Every single work phase is controlled and carried out with highly advanced machinery, Severe product quality control certifies: dimensions, aesthetics, and respond to the original product and /or to the clients specific request.

Using the SPC(Statistic Process Control) control procedure to every single working phase we guarantee the quality our customers expect from Minda Silca products. At the end of every working specific test assure constant quality right up to the finished product.

SILCA LIBRARY

This catalogue updates and completes the information regarding all the vehicle keys produced by Minda Silca. If you would like to keep your catalogues always updated, visit www.mindasilca.in or www.silca.biz. Every month you can find out what new keys have been produced by consulting the 'Silca News' Bulletins.

ELECTRONIC KEY CATALOGUE

Silca also makes its electronic catalogue available to you, also on your smartphone. The Silca electronic catalogue will be updated in real time with all the new keys making it the ideal assistant for all office activities, the management of stock references, automatic creation of orders, printing packing lists and much more.

KEY IDENTIFICATION

Keys are drawn to a 1:1 scale. Identification of a key can be made by laying the key on the drawing, paying particular attention to the blade and profile. Alternative head shapes are indicated by images around the standard head

KEY IDENTIFICATION

Transponder information

TRANSPONDER INFORMATION

An electronic chip with a nonvolatile memory which contains an **ELECTRONIC CODE**. The transponder has an antenna with which it can interface with an external electronic control device. Through the antenna the device emits a fixed frequency signal; the transponder receives the signal and transmits its electronic code, by means of special modulation techniques, to the control device, which is able to process the code. The transponder has no external input of power supply (passive system); it receives the energy necessary to work from the signal emitted by the external control device (inductive coupling between the control device antenna and that of the transponder).

IMMOBILIZER

An electronic antitheft system which interfaces with the engine control device, and often also with the starter, that allows the engine to start only when the electronic code in the transponder is recognized.

Simbology

FIXED ELECTRONIC CODE

Each key has a different electronic code. The code are fixed alphanumeric code (they are not rewritten when the engine is started).

ROLLING CODE

Each key has a different electronic code. However, the codes are changed every time the key is used to start the vehicle's engine. The procedure by which the code is changed is known only to the manufacturer of the immobilizer and is difficult to deduce by reading the transponder memory in the key.

CRYPTO CODE

The Crypto Code represents the latest generation of transponders and immobilizer systems (introducing bi-directional encryption of data). Internal protected algorithms will be configured to interpret the alternated messages changing at each cycle.

MINDA SILCA ELECTRONIC KEY

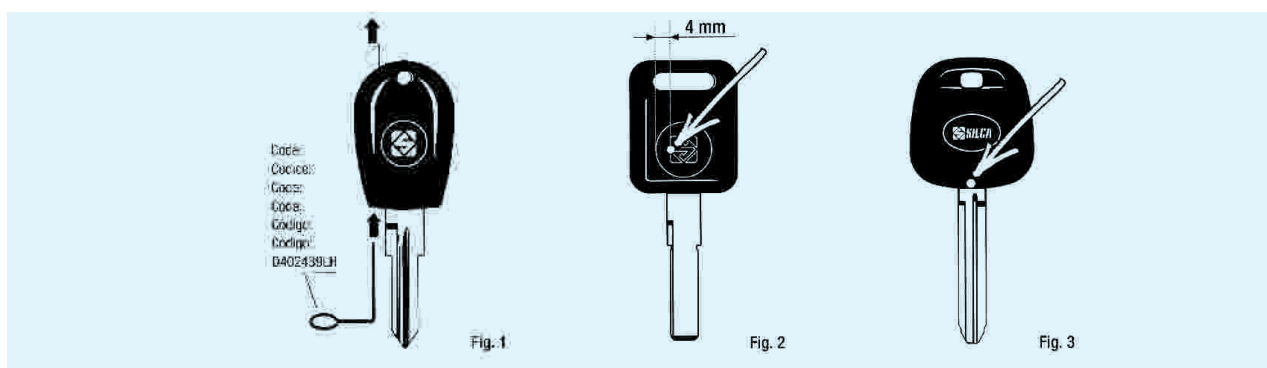

Electronic Card (with battery) that emulates the function of the Texas ® Fix code type Transponder (4C) and Crypto Type Transponder and Philips ® Crypto Type (46).

Transponder replacement

TRANSPONDER REPLACEMENT (ONLY FOR MINDA SILCA KEYS)

It may be necessary to remove the Transponder due to an incorrect procedure or key-cutting error. If so, follow the instructions given below, according to the type of key:

- Key with a single plug (e.g. GT15RT2): push out the plug through the hole in the lower part of the head, using a paper clip or preferably the accessory illustrated (fig.1). Replace the Transponder and fit the plug in place.
- Key with a pair of plugs (e.g. HU66AT5): perforate the point shown in (fig.2). until the two plugs separate. Fit the Transponder and seal with two new plugs.
- Key with two shells (e.g. TOY43T2): starting from the point shown in (fig.3), separate the two shells with a flat screwdriver. Fit the Transponder and re-assemble the key.

Silca Transponders

Silca offers a wide range of transponders enabling you to copy over 90% of vehicle keys available in market

Transponder Technology

Sophisticated software and data base are developed and dedicated to program and reproduce electronic automotive keys.

Silca has developed a special product range continuously updated with new electronic keys and transponder devices. Each new car model launched in the market represents for Silca new keys, new softwares and devices to be engineered and produced.

Silca Software

The Silca Software Programs have become the standard language of the Professional Locksmiths.

Silca has always developed and produced in house the software upgrades specifically designed for its products. The data gathering from the fourth corners of the world has granted to the company the possibility to make available to the Locksmiths innovative software programs and relevant data base and info on each single key on the market.

After Sale Assistance

Continuous product updates and collection of relevant info on the market place guaranteeing Silca's clients to be always updated with the latest info and supported in the every day job by a number of Centers of Assistance operating closest to the shops on the territory.

GTI - GLASS TRANSPONDER INNOVATION

Versatile

GTI is ground-breaking in terms of versatility thanks to its compact dimensions (Ø 3,85 mm-0,15", length: 23 mm-0,9"): it can be applied both to Silca MH keys with TA adapter and to the Silca Look A-like series¹, a new range of keys that will be constantly updated and broadened.

Technology and Multifunctionality

A single chip allows you to reproduce Transponder types Texas[®] Fixed, Texas[®] Crypto and Philips[®] Crypto. GTI can be programmed to emulate Silca Transponder types T3, T4, T7, T8, T13, T14, T16, T17, T18, T19, T21, T22, T31 and T32 simply using the "Silca TRP Setting Program" (version 2.0).

Constant Range Updating

Rely on Silca and your key cutting service will always be up-to-date with the new vehicle models launched in the markets worldwide.

Texas[®] and Philips[®] are Registered Trademarks.

The right solution in case of vehicle key loss

GTI can be programmed directly onto the car by means of a Silca device or equivalent² and/or manual procedure, depending on the vehicle model.

The GTI pre-coding is easy, fast and user-friendly.

Compatibility with Silca Transponder Devices

GTI can be used exclusively on Silca Transponder devices RW4 Plus, Fast Copy Plus, RW4 + P-Box and Fast Copy + P-Box³.

Reliable

GTI applies a security protocol that guarantees protection against potential risks of illegal cloning.

¹ Keys range with key head identical to the original.

² Silca SBB, Ilco TKO devices, other original diagnostic devices by different brands.

³ RW Software (for all devices): 03.07.065 version.

SKP/STP: 19.4.2.52 or higher versions.

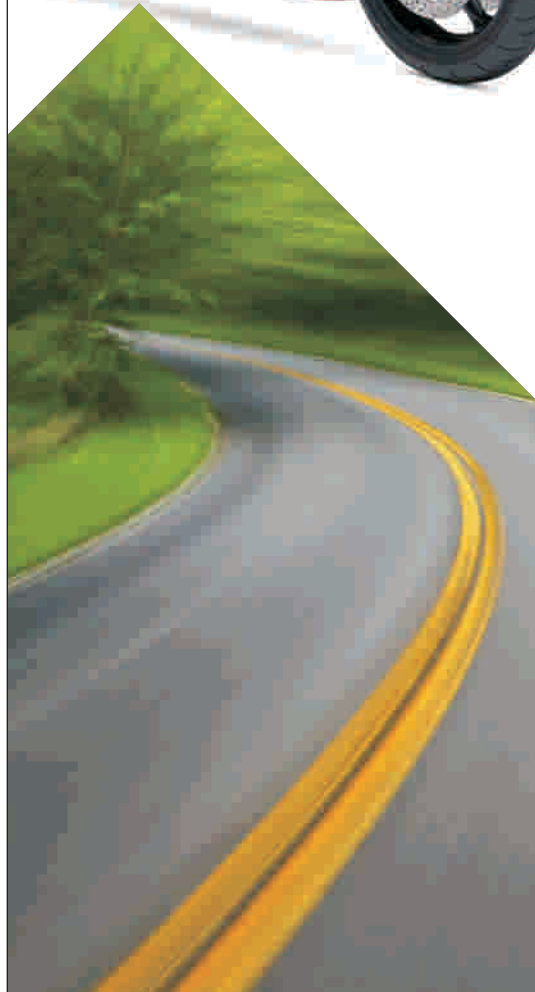

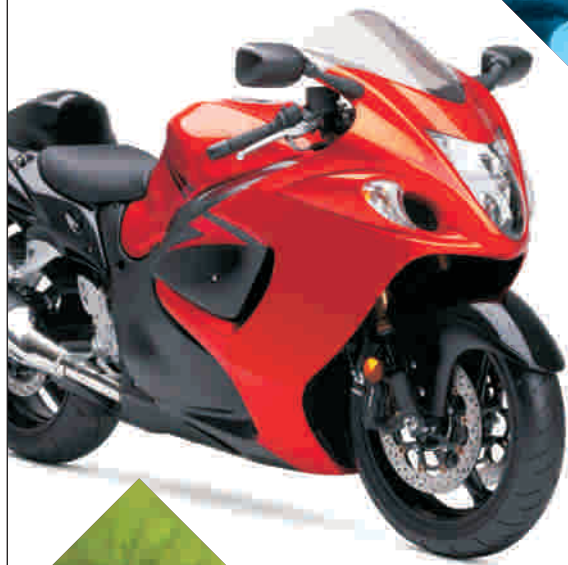

TRANSPONDER T33 - Plus

- Rewritable transponder to copy Megamos[®] Crypto type transponders (ID48-A and ID48-K) for specific Chevrolet-Daewoo[®], Kia[®] and Pontiac[®] models.
- T33 is perfect for Silca Look A-like and Flip keys and other transponder keys within the automotive range thanks to its compact dimensions (just 3 mm of diameter and 13 mm of length).
- Reliable, high-quality solution guaranteed by Silca.
- T33 is compatible with Silca transponder devices* RW4, RW4 Plus, Fast Copy and Fast Copy Plus and with the majority of devices designed to copy and program transponders available on the market.

* RW software version required In order to use the T33 transponder: 03.14.73 or higher.

TRANSPONDER T48

- 100% guaranteed cloning solution for Megamos[®] Crypto ID48 transponder.
- Compatible with Silca's cloning devices (RW4 Plus, Fast Copy Plus, RW4+P-Box, Fast Copy+P-Box) getting the most out of your investment.
- Perfect for Advanced Diagnostics[™] Programming procedures for vehicle remotes.
- The T48 glass transponder fits original transponder keys and remotes, as well as all Silca's replacement vehicle keys.
- T48 is exclusively developed to be used with SILCA M BOX SOLUTION based on extended transponder compatibility.
- Silca T48 covers over 200 vehicle models from the major automotive groups worldwide

Empty Shells

Empty Shells range

The line of Silca Empty Shells is the ideal solution where the original key cannot be used due to a broken or damaged mechanical part, whereas the electronic part can be used on the Silca key and so recovered.

Silca Empty Shells, a currently available Silca product line of plastic headed vehicle keys and spare parts designed to integrate the original electronic component of remote controls.

Empty Shells Updates

Discover Silca Empty Shells range updates visiting www.silca.biz and ekc.silca.biz.

Empty Shells Package

Practical one-piece package for optimized stock management and hook display.

Look A Like Keys

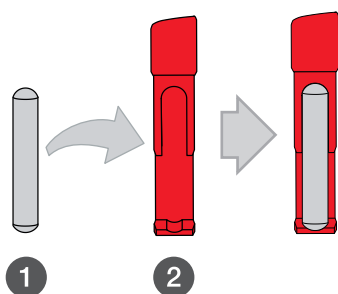

Look A-like keys range

GTI is compatible with the new Silca Look A-like transponder keys series: a vehicle keys range with key head design identical to the original.

You will be able to easily recognize Silca Look A-like keys range thanks to the reference ending in TE (eg. F010TE).

- Key head design identical to the original.
- Wide and continuously updated keys range.

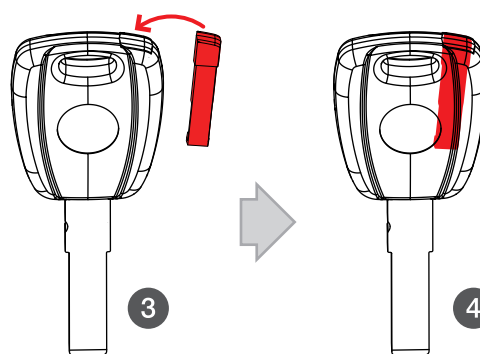

TRANSPONDER COMPONENTS

CODE **C03313**

- 1 GTI Transponder 2 Transponder adapter

TRANSPONDER KEYS AND GTI

CODE **SIP22TE**

- 3 Transponder key without GTI 4 Transponder key with GTI inside

Machines

DUO

With Duo Silca introduces an innovative concept of key-cutting machine.

A double carriage makes it possible to cut flat keys for cylinders and vehicles, cruciform keys, bit and double bit keys and mail box keys.

- ◆ Flared Cuts : the special tilting mechanism provided by the combination of dedicated shaft & carriage movement makes it possible to make excellent flares on bit & double bit keys.
- ◆ Carriage movement : provide with an innovative release system to allow working with a free moving or regulated carriage.
- ◆ Cylinder keys carriage : four-sided revolving clamps.
- ◆ Bit and double bit keys carriage: two/three sided revolving clamps
- ◆ Protection of all internal moving parts from swarf intrusion.
- ◆ Operator Safety : mobile cutter safety shield, cut-out switch that triggers automatically if power fails.
- ◆ Machine built in compliance to CE Directives
- * Special keys such as Abus & Abloy type key can be cut on Duo Plus Model without the need for accessories.

TWISTER II

Twister II is a key-cutting machine that provides quality performance and precision in duplicating a wide range of Dimple keys with flat cuts, Laser type keys and Fichet type keys.

- ◆ Easy to use, reliable, compact and solid.
- ◆ Smooth and precise carriage movements.
- ◆ Spring loaded tracer point (for Dimple keys).
- ◆ Built in light to illuminate the working area.
- ◆ Protective shield on the machine body : protects from swarfs during key operations.
- ◆ Accessories provided : tracer point/cutting tool to be used in duplicating a wide range of dimple keys with flat cuts and laser type keys.
- ◆ Optional Accessories : a range of optional accessories is available to widen the key types cut by Twister II machine: a dedicated accessory has been designed for tubular key types*.

® Registered Trademarks

FLASH 008

Flash 008 is the mechanical key cutting machine for flat cylinder and vehicle keys. It cuts also cruciform keys and keys with long necks, tip stop and flip mechanisms.

Flash 008 is easy to use and features long-lasting materials and finishes. Lightweight and compact, it is perfect for small shops and mobile use. A fixing bracker allows the machine to be secured to the work-bench for better stability while cutting.

- ◆ Smooth carriage movements
- ◆ Four-sided clamps with ergonomic handles mean flexibility of use.
- ◆ Optimized calibration
- ◆ Resistant to wear components - Aluminum, Titanium Nitride coated cutter & Teflon coated bush for longer life & protection to the carriage shaft.
- ◆ Space saving solution for fixed or mobile use.
- ◆ Safe for user.
- ◆ Cut keys finished perfectly by the "Tynex" de-burring brush.

Machines

Futura is Silca's new ground-breaking Electronic Key cutting machine to copy Flat, Laser, Dimple and Cruciform keys.

- ◆ TABLET integrated solution to keep Silca Software database and functions at hand.
- ◆ Innovative LED lighting that changes color according to the machine's status for an immediate process control.
- ◆ Entirely automated movements on 3 axis and step-by-step guided key cutting operations.
- ◆ Easily-accessible remote support by technical assistance staff via dedicated application.
- ◆ Compact dimensions and functional details to make the machine easy to carry and suitable for small sized shops and van transportation.
- ◆ Comfortable and efficient working area with integrated Swarf tray, Accessories area and Tool holder.
- ◆ Selected components, high-quality materials and cutting-edge technologies applied, guaranteed by Silca.

The Fast Copy Plus is the Silca Transponder Programming solution: Accurate, Easy to use, Reliable.

- ◆ Transponder Identification : detects if keys are equipped with Transponders or not, identifying the type of transponder.
- ◆ Transponder Reading : reads and displays alphanumeric fixed code transponders. can also identify different types of Crypto Transponders.
- ◆ Fast Copy Plus is the unique device which can decode and copy in stand alone mode the following types of transponders:
 - Philips Crypto ID40, ID41, ID44 and ID45: -Texas Crypto ID46
 - Texas Crypto II and III ID6A: -Texas ID4C fixed code:
 - Temic, Philips Megamos fixed code transponders.
- ◆ Mains operated and portable unit(power supply through cigarette lighter wire).
- ◆ Filing : Codes archiving unlimited when used with P.C.(Silca Transponder Program).
- ◆ Machine memory / Software updation via USB or RS232 connection.

Fast Copy Plus is very user friendly: the 2-keys keyboard allows the user to interact with the machine quickly and easily.

SILCA M BOX - 100% guaranteed cloning solution for Megamos® Cryptos ID 48 Transponders

The MVP Pro offers Innovative 'Pay As You Go' Road side Key Programming, but at a fraction of the cost. Using digital tokens, which are deducted when keys are programmed, makes the MVP Pro unique.

The MVP Pro is supplied with all available software FREE. Software is continually being developed by Advanced Diagnostics for most car manufacturers worldwide. When new software modules are released, they can be easily downloaded onto the MVP Pro free of charge via the internet.

Designed with simplicity in mind, the MVP Pro guides you through various processes for key programming & remote key fob programming, from the more basic keys to proximity and smart keys across all makes of vehicles worldwide, on one programmer.

Most vehicle immobiliser systems require security access (PinCode) to allow keys & remotes to be programmed. The MVP Pro reads many Pin Codes & where they cannot be read, Advanced Diagnostics offers a service to customers to obtain a range of Pin Codes online.

Functionality

- | | | |
|----------------------------------|--|-------------------------|
| ◆ All Makes Coverage | ◆ Program Aftermarket & OEM Keys | ◆ Component Actuation |
| ◆ Provide Roadside Programming | ◆ Program Aftermarket & OEM Remote Key Fob's | ◆ ECU Identification |
| ◆ Read & Clear Fault Codes | ◆ Read Immobiliser Pin Codes | ◆ Simple User Interface |
| ◆ Clear Key Memory | ◆ Read Pre-Code Data | |
| ◆ Program Keys | ◆ Display Live Data | |
| ◆ Program Proximity / Smart Keys | | |
| ◆ Program Remote / Flip Keys | | |

* Now **SMART DONGLE** & **SMART AERIAL** (optional accessories) available for use with MVP PRO devices.
