Swift Mobile

ON THE GO MACHINE FOR EASIER LOCKSMITHING

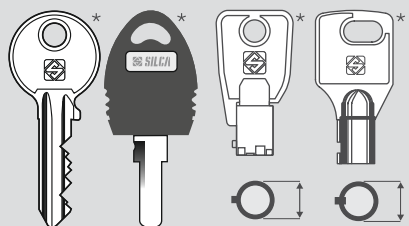

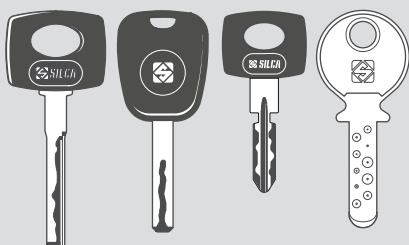

Battery Operated mechanical key cutting for Dimple, Laser & Tubular Keys

Swift Mobile is a battery operated, mechanical key cutting machine for dimple, laser and tubular keys. Easy and Comfortable to use and made with resistant and durable materials, Swift Mobile is reliable ensuring quality cutting results.

Swift Mobile contains a quality PCB controlling the battery status. Lightweight, Durable and Compact, it is perfect for small shops, and "on the go locksmithing".

Swift Mobile

Swift Mobile is battery operated mechanical key cutting machine for dimple keys with flat cuts, laser keys with internal, external, double external cuts and narrow stems and tubular keys with the use of the optional tracer and cutter. It can also accommodate smaller laser keys with optional EG Adaptor

* Tubular keys cut with optional tracer and cutter
Ø min. 4 mm - max. 12 mm

CE Swift Mobile has been designed and manufactured in conformity with CE mark European standards.

Technical Data

Power supply : Li-Ion Battery 22, 2V 2900 mAh
Power adaptor : MeanWell GST60A24-P1J-24V-2.5A
Cutter motor : 24VDC 120W
Cutter speed : 6000 rpm +/-10%
Cutter : AICrN coated
Carriage movements : Carriage on linear bearing
Runs (Max length of cuts) : 42 mm
Dimensions : Width: 260 mm, Depth: 285 mm, Height : 315 mm
Weight : 12 kg

Battery operated for "on the go locksmithing"

The machine is operated by a 2900 mAh, rechargeable battery. When the machine is fully charged it can duplicate up to 100 brass keys. Coloured light indicators show the level of the battery and when it needs recharging.

Perfect illumination of the work station

The integrated elongated lamp guarantees a perfect lighting on the working area.

Precise calibration means quality key cutting

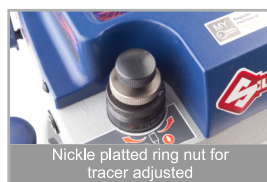

The machine is equipped with sprung tracer point and adjustment of nickle

plated ring nut for the perfect calibration of dimple keys. Also big knob is also there to ensure more torque for locking the tracer. Ensuring quality of duplication, even when original keys are worn out.

Practical accessories area

On the upper part of the machine there's a handy accessories compartment that makes it easy to reach the most frequently used tools.

Ergonomic and Comfortable in use

The levers, knobs & handles of the machine are made of engineering plastics and, thanks to their ergonomic shape, they guarantee comfortable grip and handling. Also the carriage shifting via liner bearing results in smooth movement & precision in key cuts

Lightweight, Resistant and Durable

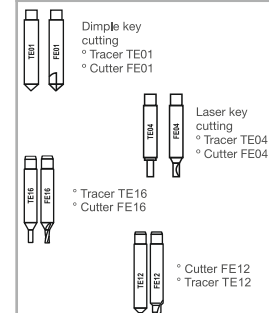

Swift Mobile is light

weight, compact and made of top-notch components. The cutters provided are AICrN coated plated for better wear resistance, while the motor has a longer life compared to most machines of the same category available on the market.

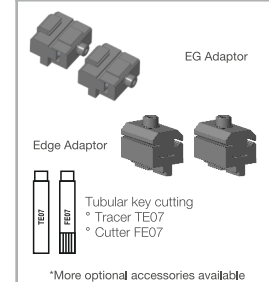

Safe for the operator

The mains switch of the machine is thermal-magnetic, a security device that prevents that the cutter automatically turns on after an abrupt interruption and reactivation of the electric power.
